

STRATASYS FORTUS 380MC

Product description:

The 380mc and 450mc 3D production systems let you build, accurate, repeatable parts faster than ever before. Produce jigs, fixtures, factory tooling and end-use parts, as well as functional prototypes to withstand stringent testing. With four layer thicknesses to choose from, you can strike the right balance between strength, detail, and FDM's fastest build time.

For maximum time savings, Fortus 380mc and 450mc build complex parts faster than their predecessors. Both feature an all-new touchscreen interface for straightforward operation and maintenance.

Models material

Building materials ABS-M30 six colors, ABS-M30i, ABS-ESD7, ASA, FDM Nylon 12, PC, PC-ISO

Support material

Support Structures Soluble. Soluble or breakaway for PC, breakaway for PC-ISO.

Dimension

Prototype size 355 x 305 x 305 mm

Machine size (width x depth x height) 127 x 90,17 x 194,31 cm

Print

Print mode Layer thicknesses: 0,330 - 0,254 - 0,178 - 0,127 mm
